The CISC Ontario Awards for Excellence in Steel Construction

cisc icca
SHOWCASING THE RESILIENCE OF STEEL

INFORMATION AND CRITERIA

*THE PROJECT MUST BE SUBMITTED IN THE FOLLOWING CATEGORIES:

(See description of each category below)

- Architectural Walkways/ Pedestrian Bridge Projects
- Bridge Projects
- Commercial / Residential Projects
- Erection (Ingenuity/Constructability)
- Institutional / Industrial Projects
- Renovation/Retrofit Projects
- Young Architects / Engineers

*Projects cannot be submitted in more than 2 categories
**Fabricators and detailers must be members of the CISC

KEY DATES & SUBMISSIONS

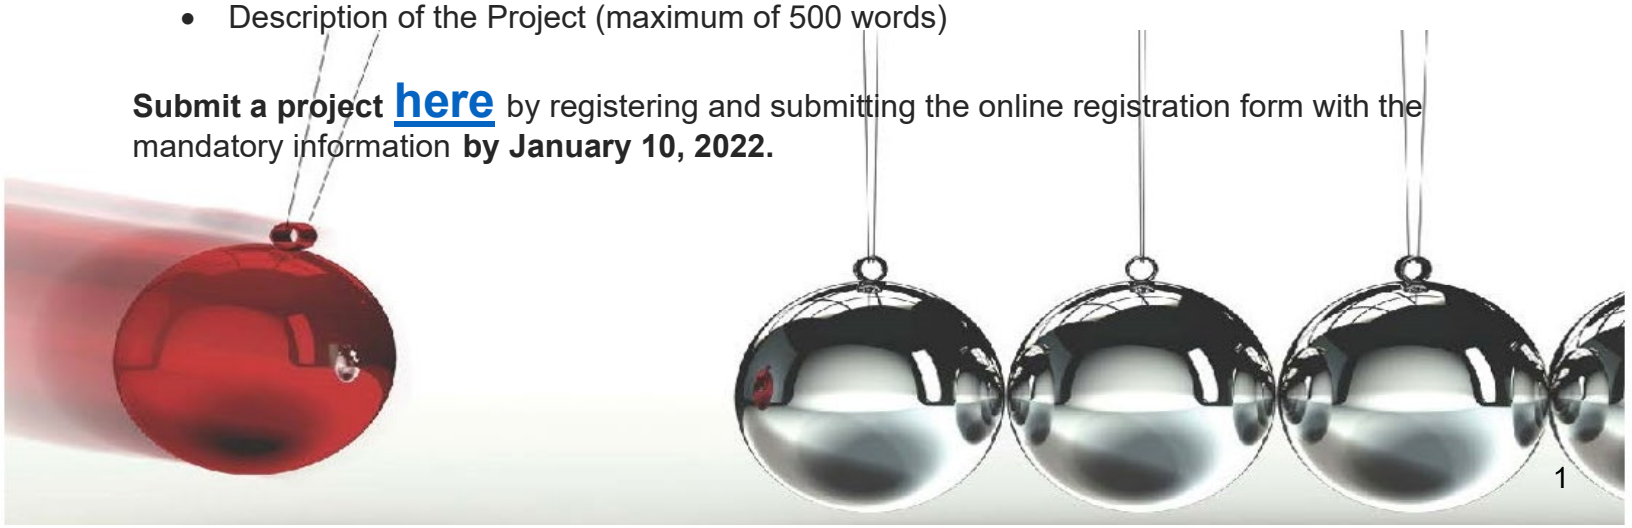

STEP 1:

Intention to Submit a Project:
Each team must indicate their intention to enter a project in the contest as of **October 2019 and December 2021**; To avoid the rejection of submissions, ensure to complete all required information for review by CISC.

The following information is mandatory:

- Name of the Project
- Location of the Project
- The members of the Team
- Description of the Project (maximum of 500 words)

Submit a project here by registering and submitting the online registration form with the mandatory information **by January 10, 2022.**

STEP 2:

If your submission is accepted, you will be notified by January 28, 2022.

To finalize your project submission, click on the link received in your registration confirmation email. Simply log in your account and add the following mandatory information to your online submission:

- ➔ Explanation of the reasons for choosing a steel frame.
- ➔ Highlights of each: the architectural, technical, sustainable, innovative, or particular interest aspects.
- ➔ A minimum of five color photos (JPEG format - high resolution), showing the structure and architectural aspects of the project. These images will be used to:
  - ✓ present the project at the evening of the awards ceremony.
  - ✓ to produce written and online material, posters, panels, etc.
  - ✓ for the presentation of the winners in Advantage Steel Magazine and for any article publication on the CISC website or Newsletter.
  - ✓ If photo credits are required, please specify.

Note: The architect, the engineer, the fabricator, or the detailer that submit the project, are submitting on behalf and in the name of all the stakeholders.

All entries must be received by the CISC by 5:00 pm, ET on February 25, 2022.

SHOWCASING THE RESILIENCE OF STEEL

To be eligible for the **Ontario CISC Awards of Excellence in Steel Construction**,

the project must meet the following:

CRITERIA:

THE PROJECT will make use of structural steel in an aesthetic, ingenious, innovative, and sustainable way. The project team must also describe the recycling or reuse of steel or any other measure that incorporates steel in a concept of sustainable development
THE STRUCTURE must be in Ontario if the project team is not primarily from Ontario.
THE PROJECT TEAM should be mainly from Ontario if the structure is not in Ontario.
THE STRUCTURE must have been built or inaugurated between January 2020 to December 2021.
THE FRAMING for all categories must have been manufactured or designed (drafted) by a CISC member.

CATEGORIES:

ARCHITECTURAL WALKWAYS / PEDESTRIAN BRIDGES: projects will be rewarded for the architectural expression of the project and the surrounding environment, ingenuity, originality.
BRIDGE PROJECTS: projects will be rewarded for the architectural expression of the project, ingenuity, and originality. Some important factor to also consider-environmental impact of the project, span length advantages, improved life-expectancy-prefabricated components.
COMMERCIAL / RESIDENTIAL PROJECTS: the project team must demonstrate the architectural expression of the work, innovative approaches and / or technical challenges that were overcome.

ERECTION (INGENIOSITY - CONSTRUCTABILITY): The Engineer, Fabricator or Erector must describe the original approach adopted to carry out a project or a part of a project at term; Creativity and innovation during construction; Ingenuity or method of construction; Constructabilityof the project; Innovative and creative solutions.
INSTITUTIONAL / INDUSTRIAL PROJECTS will be rewarded for structural efficiency, architectural expression, functionality, and installation (erection) of the structure.
RENOVATIONS / RETROFIT PROJECTS will be rewarded for the architectural expression of the project, the ingenuity of solutions and use of hybrid materials, where applicable.
YOUNG ARCHITECTS / ENGINEERS: The Architect or Engineer must describe the original approach used to bring a project or part of a project to fruition. This person must be under 40 years of age on January 1st, 2022 and must be sponsored by a practitioner in the context of a construction project.

For the Categories “Jury Favorite Buildings” & “Jury Favorite Bridges” the choice remains solely the selection of the members of the jury.

JURY FAVORITE refers to structures or their elements which are distinguished by their excellent design and their social, architectural, technical. or technological contribution. Projects are selected by the jury only among the finalists of all categories.

JURY members have the discretion to classify submitted projects under a different category, based on the information provided by the submitting parties. The teams will be made aware of the change and have an option to withdraw the project as a contender.

Jury members shall be chosen from: Architects, structural engineers, academia, media, associations or other, related to construction, who have not participated in the projects entered in the contest.

JURY decisions are final.
