* KEY DATES & SUBMISSIONS

STEP 1:

Intention to Submit a Project:
Each team must indicate their intention to enter a project in the contest for projects completed between **December 1st, 2019, and March 1st, 2022**; To avoid the rejection of submissions, ensure to complete all required information for review by CISC.

The following information is mandatory:

- Name of the Project
- Location of the Project
- The members of the Team
- Description of the Project (maximum of 500 words)

STEP 2:

If your submission is accepted, you will be notified by **August 29, 2022.**

To then finalize your project submission, click on the link received in your registration confirmation email. Simply log in your account and add the following mandatory information to your online submission. All entries must be received by the CISC by 5:00 pm, ET on September 19th, 2022, and include the following:

- → Explanation of the reasons for choosing a steel frame.
- → Highlights of each: the architectural, technical, sustainable, innovative, or particular interest aspects.
- → A (Presentation in PDF with photos included)
  minimum of five color photos (JPEG format - high resolution), showing the structure and architectural aspects of the project. These images will be used to:

  - ✓ present the project at the evening of the awards ceremony.
  - ✓ to produce written and online material, posters, panels, etc.
  - ✓ for the presentation of the winners in Advantage Steel Magazine and for any article publication on the CISC website or Newsletter.
  - ✓ If photo credits are required, please specify.

Note: The architect, the engineer, the fabricator, or the detailer that submit the project, are submitting on behalf and in the name of all the stakeholders.

All entries must be received by the CISC by 5:00 pm, ET on September 19th, 2022.

To be eligible for the **Quebec CISC Awards of Excellence in Steel Construction**, the project must meet the following:

Key criteria:

THE PROJECT will make use of structural steel in an aesthetic, ingenious, innovative, and sustainable way. The project team must also describe the recycling or reuse of steel or any other measure that incorporates steel in a concept of sustainable development.
THE STRUCTURE must be in Quebec if the project team is not primarily from Quebec.
THE PROJECT TEAM should be mainly from Quebec if the structure is not in Quebec.
THE STRUCTURE must have been built or inaugurated between December 1st, 2019, and March 1st, 2022.
THE FRAMING for all categories must have been manufactured CISC member or designed (drafted) by a CISC Associate.
